

ENVIRONMENTAL PROTECTION

Ways to Protect environment

WASTE SORTING

Try to Sort and Recycle household waste. Waste is collected at its source in each area and separated.

USING OF SOLAR ENERGY

Solar roof panels

Install solar panels on your roof. Solar panels capture the energy of the sun and use that energy to power lights and heaters.

PLANT TREES

Trees absorb carbon dioxide and emit oxygen, improve area water quality and help make the ground more fertile for other plants

ENERGY-SAVING LAMPS

Compact fluorescent light bulbs use at least two-thirds less energy than standard incandescent bulbs to provide the same amount of light, and they last up to 10 times longer.

VEGETARIAN FOOD

Go vegetarian once a week. One less meat-based meal a week helps the planet and your diet.

CHANGING TRANSPORTATION HABITS

Walk or ride a bicycle when your destination is close to home to avoid harming the environment by Car Pollution.
