

# A FEW TIPS ON HOW TO CELEBRATE

# WORLD ENVIRONMENT DAY EVERY DAY

**Power saving A+** home appliances are environment-friendly... and pocket friendly too.

**Covering your saucepans** whilst cooking means that you **save up to 25% in power.**

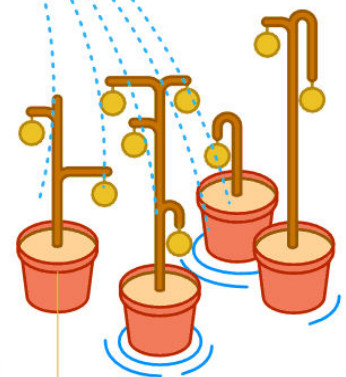

**Keep the oven for your roast.** 25°C heating at home will be hot enough during the winter, while 21°C is cool enough in summer.

**Take your own bags** to the supermarket. Disposable plastic bags create unnecessary waste.

A bubble bath may be relaxing... **But a shower uses 5 times less water.**

Are you going out or away from home for a while? **Turn off any home appliances that you won't be using.** Using standby mode also adds to your electricity bill.

**Go local.** Consuming groceries produced in your area will **reduce your carbon footprint.**

**GUJARAT CLEANER PRODUCTION CENTRE**
